

**MANIFESTO FOR DECENTRALIZED
ASSEMBLY DEMOCRACY
AND THE UNINTERMEDIATED BANKING
(P2P BANKING)**

GOLDEN CLOUD TOKEN [GCT2]

<https://www.goldencloudtoken.com>

1. PREAMBLE

We live in disruptive times. These are days where the imagination does not stop dreaming, to realize that we are awake. The time has come to take an active part in building a form of government that gives voice and vote to all the people of the world equally.

We will build a democratic and decentralized society based on creativity, cooperation and equity.

Golden Cloud (<https://www.goldencloudtoken.com>) develops its digital currency [GCT2] (ID: 9DYPDwwxmUjtdKtEdfk8eUMmG43H1G8AUBpYoiZcPc3) in order to eliminate the control of a large superpower or industry of any market, being able to build a more just and equal society in opportunities. This action is undertaken after detecting the following failures in the current economic and political system:

- A) The capitalist model based on debt, creating agents "owners of the market", because they can not disappear or fail. They are anomalies that dominate growth.
- B) The creation of opaque money in the banks, from the loan of money to insurance agents simultaneously (to lend the same money more than once in the same time from the same capital)
- C) Pseudo-Democracy: Representative democracy is not democracy, it is representation. There is already a technology capable of lowering the costs of the political class by converting each citizen into their own voice in the parliament or assembly. Thanks to blockchain it is possible to develop true democracy in any part of the world. Democracy only works when you participate, but it gives you a voice and control of your area.

As long as we do not participate in other forms of financing, we will not alleviate inequality and exploitation in the world. Luckily, a few years ago the invention of **cryptocurrencies is weaving a new banking system.**

Golden Cloud through the development of a decentralized platform that allows investment or savings between individuals in order to articulate a democratic economy, full of opportunities, dynamic and social.

We encourage entrepreneurship, research, critical thinking and disobedience in unfair situations. Join our assembly and global working groups.

Build P2P Banking for Golden Cloud [GCT2] and the Digital Assembly Democracy based on Blockchain.

Let's build the society we want to have together. And let's do it now.

The following manifesto is divided into three parts:

- I) PART I: HUMANITARIAN VALUES. PROPOSED MODELS.
- II) PART II: ORGANIZATION OF GROUPS.
- III) PART III: ECONOMIC ORGANIZATION.
- IV) PART IV: THIS IS NOT THE FINAL.

PART I:

HUMANISTIC VALUES.

PROPOSED MODELS.

GCT2. ESSENCE AND PHILOSOPHY

In Golden Cloud Token the individual is identified by their portfolio number. Each collaborator is the official representative of GCT2 and is representative of himself and nobody else. We eliminate therefore the concept of "representativeness" because it is false and naive, interested and populist.

GCT2 will have temporary project coordinators, if as a whole it is proposed and elected by referendum as spokesperson of the movement for the assembly to carry out tasks.

The temporary coordinator will lose his privileges as a collaborator of GCT2 in the performance of his position as coordinator in the tasks entrusted.

Golden Cloud Token is a platform based on Blockchain to promote Digital Assembly Democracy and Disintermediated Banking (P2P BANKING)

BASIC RIGHTS

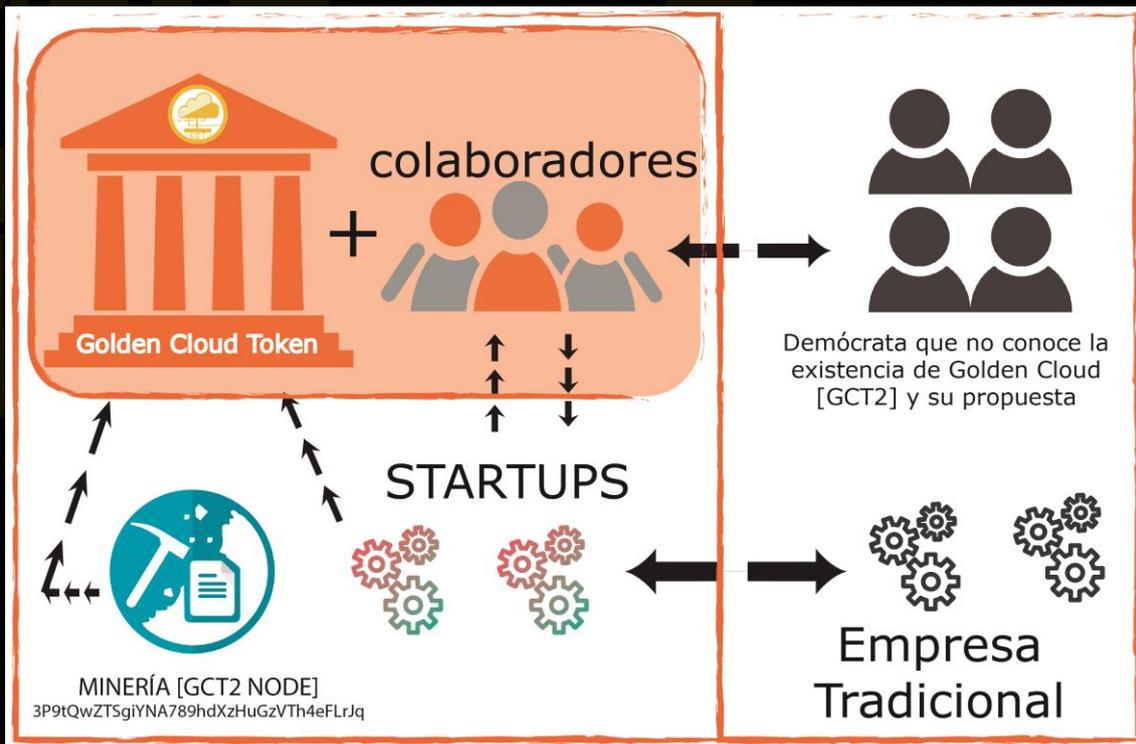

The fact of owning a portfolio of GCT2 / WAVES with GCT2 housed in the portfolio, and at least 0,001 WAVES, GCT2 user shall have the following rights:

- Right to vote
- Right of proposal, demonstration, press and freedom
- Investment right in P2P BANKING
- Right of own representation, that is to say, this individual can not be represented unless authorized by the latter. In accordance with the basic principle of non-representation of the Digital Assembly Assemblies.

You can participate in work groups without buying GCT2: obtaining a GCT2 through simple jobs. In this way we allow the inclusion of people without economic resources in the Digital Assembly Democracy.

Solidarity is allowed and encouraged for the sending of GCT2 to portfolios of people without resources through a solidarity contest that rewards solidarity.
 In the same way, you can get several GCT2 and change them for WAVES to obtain enough WAVES to pay the system fees (Fees)

MODEL OF DECENTRALIZED COLLABORATIVE ECONOMY

Golden Cloud Token [GCT2] works in the Blockchain of Waves, since we consider that the moment to create a private blockchain, as well as the number of minimum guaranteed miners, the genesis portfolios, the distribution of costs and benefits, etc. they should be determined by a large majority of 4/5 by means of a meeting, after a long discussion among the GCT2 collaborators about the ownership of this system of government, ideally the development of multiple versions adapted to the local needs of each community, not being this more than a recommendation of the author.

GCT2's economy will be based on four pillars:

- A) Startups
- B) Mining
- C) Collaborators
- D) Par GCT2 / WAVES

Startups:

StartUps will be able to enroll in the collaborative economy market in two ways:

- Through the payment of 20,000 GCT2: After completing the form after the "List your Token" button, where the main data of the cryptoactive as well as the activity of the project will be given, 20,000 GCT2 will be paid, which will be allocated from the the following way: 50% dedicated to social funds and 50% dedicated to management and payments of Fees of the system.
- Enrolling in GCT2: Free and automatic option. It will be necessary to register in the P2P BANKING Area to list your free token in GCT2 Labs. If your token receives 10,000 positive votes, we will list your token for free in our portfolio with BTC, ETH, WAVES, GCT2 and the main currencies of the P2P BANKING market

Mining:

Mining will be fed with the WAVES from any direction, and will be distributed in the percentages determined in the mining section of the official website of GCT2 and in the thread corresponding to our mine [GCT2 node] in the WAVES forum.

(<https://forum.wavesplatform.com/t/golden-cloud-node-gct2-https-www-goldencloudtoken-com/5534/2>)

The funds generated by the mine will be used to:

- a) Distribution of GCT2 among the miners
- b) Payment of System Fees and Management
- c) Investment and attraction of talent (P2P BANKING)

Collaborators:

Employees will receive payments for one of these reasons:

- Payments for work done
- Promotion of values according to GCT2 and its community approved by assembly
- Payment of expenses derived from peaceful and democratic purposes, that return justice to those who claim them, approved and / or reached by referendum
- A lost fund (previous approval of the meeting by a large majority of 7/10 parties or more) for a cause related to the values of GCT2
- Airdrops. Possible implementation of a Basic Salary for all GCT2 employees if this measure is approved by referendum in assembly.

The collaborators must:

- They should never work for free
- Work and / or collaborate only in those projects in which they can contribute constructive ideas. Be proactive
- Defend the Digital Assembly Assembly Democracy, because each of them is that manifestation of freedom.

Pair GCT2 / WAVES:

The GCT2 / WAVES pair is the last pillar of the economy, since a high difference between the cost of GCT2 and WAVES to the point of keeping the Fees unsustainable (currently under 1 euro cent) will force the creation of a private Blockchain for guarantee its existence.

Currently only listed on the WAVES DEX.

P2P BANKING: UNINTERMEDIATED BANKING MODEL, BANKS WITHOUT BANKS.

When a Startup already has a defined product or service, what you want is:

- Get a mass audience
- Commercial / Sponsors / Employees
- Investors and promoters for your project
- Advertising. Marketing and networking work
- Tax, financial and strategic advice

In the traditional system a Startup should go to Business Angels, a private investor or traditional banking (of all the options shown, this is the least bad). In our P2P BANKING system, a startup must develop its own token in the WAVES platform (Cost of development of the token: 1 WAVES) and deliver to GCT2 the percentage of the tokens that it considers for its distribution (at least 10%) among our collaborators registered at the time of delivery. The distribution will be proportional to the number of GCT2 that the creative account of the token possesses at the time of delivery.

We will create a working group for each startup in order to meet the needs of the aforementioned startups, and we will defend the rights of the collaborators of these

work groups. Golden Cloud Token [GCT2] will also help and collaborate with the startup to the extent that the startup wishes.

Golden Cloud Token [GCT2] will not charge taxes to collaborators or companies, however it will take 5% of each "proposal financing direction" in order to sustain the system itself and redistribute wealth on a global scale among collaborators, in order to ensure the greatest possible equality within the community. The main value of GCT2 will not be money, it will be knowledge. The percentage of 5% will be estimated, and will not be charged until it is decided by referendum by the Digital Democratic Assembly.

In case of approving a basic salary, it is possible that this percentage is insufficient to guarantee this decent base salary. GCT2 does not have a maximum number of collaborators because its token can be re-edited. In any case, the creation of new GCT2 must be approved by the assembly through a referendum with a 4/5 ratio.

The main advantage for startups is the free promotion, the increase in transactions with your token, as well as the alliance with Golden Cloud Token, appearing on the front page of your website, as well as in your portfolio and decentralized functions.

To introduce a startup in P2P BANKING, one of the two options indicated in point MODEL OF DECENTRALIZED COLLABORATIVE ECONOMY: Startups.

PART II: ORGANIZATION OF GROUPS

GLOBAL WORKING GROUPS

Golden Cloud Token is not a State nor a non-profit association. Golden Cloud does not respond to any government or the private interest of any company. We understand the States as an outdated social convection that only generates problems for the different inhabitants of the world, because it differentiates them by places and they have an obsolete representation structure.

Golden Cloud Token [GCT2] is an organized community that fights for the Digital Assembly Democracy based on Blockchain and the Disintermediated Bank. In Golden Cloud Token all collaborators have their own voice and vote, since we consider freedom as the greatest value of humanity, that is why we consider it absurd to impose a vertical hierarchy.

Our working groups are democratic and assemblies. The decision will be made through "Digital Referendum" in the Golden Cloud portal (<https://www.goldencloudtoken.com>) . We promote peace, constructive dialogue, assembly democracy without representation, feminism and the technological revolution triggered by the development of Blockchain and cryptocurrencies.

Each and every one of the processes that affect the formation of the Working Groups will be discussed during the celebration of the "Constituent Process", and may be modified as long as the assembly approves their remodeling by a 3/5 majority.

All members of GCT2 are equal in terms of the rules set by referendum, remuneration for their work and obligations assumed in the assembly, and have the right and duty to promote it.

BEGIN TO BE A COLLABORATOR

To start being a collaborator, it will be enough to have a GCT2 in your account. You must also have at least 0.001 WAVES (less than one euro cent) to be able to move and use your GCT2 since we move in the WAVES blockchain.

No charges can be bought or sold to organize the teams. The structure of the teams is horizontal and will be organized according to activities or projects, which will force the rotation of positions and therefore, the empathy with those harder jobs. We are tired of politicians who charge to applaud, lie, and talk about themselves.

According to the previous paragraph and without contradicting the principle of equality as a basis for the community of GCT2, for the development of project or tasks there will be an organization according to the following scheme of responsibilities:

- Ideologists and technicians: Responsible for the conception of the idea and strategy. Intelligence. They will collect 20% of the funds destined to the project
- Coordinators: They will be in charge of transforming the ideas of the ideologues and technicians in a planned and objective plan. Distribute the work among the collaborators: They will collect 30% of the funds destined to the project
- Collaborators: They will be responsible for materializing the ideas, phases and proposals of the coordinators. The own initiative will be rewarded as long as it does not harm the image of GCT2, after being debated in assembly. The coordinators will charge 50% of the funds destined to the project.

Therefore, to start collaborating in Golden Cloud Token [GCT2] it is necessary to follow the following steps:

- Create a free account in GCT2 (<https://www.goldencloudtoken.com>) in the 'WALLET' section, with which you will obtain the necessary portfolio number to prove your existence and receive your payments.
- Acquire GCT2 and WAVES. We recommend that the ratio be 1000 GCT2: 1 WAVES, since the commissions of the system are 0.001 WAVES. In this way, for each WAVES we can make 1,000 transactions with GCT2
- GCT2 can be purchased in the desired proportion if your intention is to invest in Startups hosted in the P2P BANKING area. If you are not an investor, simply buy GCT2 in the proportions mentioned above.
- Join the Telegram channels enabled to propose, organize and defend the Digital Assembly Democracy as a new form of government.
- Once your portfolio is created, only you will be able to access it, so it CAN NOT be recovered. You must keep your SEED (password of 15 words) in a safe place. If you have any doubts, we recommend visiting our FAQS section to understand the operation before taking any action.

DEGREES OF PARTICIPATION

All GCT2 users have the same rights and obligations, not having to obey any order because "we believe that humanity can work together in small groups according to their interests."

In order to guarantee order, digital assembly democracy will consist of two discussion channels:

- **Urgent route:** By requesting a referendum paying the system fees (fixed by referendum)
- **Ordinary route:** Through discussion in small groups and subgroups organized by communities or projects about the final proposal that will be listed in the "Assembly" section to raise funds for this project, thus being able to finance a new Startup that would be incorporated to the area of P2P BANKING, if the new company or the social project in depressed areas so wishes, the fight against dictatorships or other areas or projects that threaten the Digital Assembly Democracy.

PART III: ECONOMIC ORGANIZATION

UNDERTAKE GCT2 IN THE COLLABORATIVE ECONOMY MARKET: BEGIN TO BE A STARTUP

Prior to the StartUp list, it will deliver the percentage that suits GCT2, with a minimum of 10%, for the distribution of these tokens among the collaborators registered at the time of the delivery of tokens. The delivery will be proportional to the number of GCT2 that the StartUp has.

The collaborators will have free disposition to do with those tokens what they agree (to sell them, to keep it or to burn them)

The collaborators will be able to create their own token in the WAVES platform and have a double function "collaborator- Startup". This relationship is detailed in detail in "The Theory of the Producer Client", which we will publish shortly in the working groups of GCT2

The collaborators will consider whether they decide to support a startup or not, all or none. The startups will increase their daily transactions thanks to contact with our collaborators

ROAD MAP

PHASE 1: 2018

- a) Wallet Creation
- b) Creation Official Web
- c) Start-up "P2P BANKING"
- d) Start-up "Mine: GCT2 node" Address:
3P9tQwZTSgiYNA789hdXzHuGzVTh4eFLrJq

PHASE 2: 2019

- a) Start-up "Digital Assembly Democracy"
- b) Build business fabric (+ 200 Startups)
- c) List of GCT2 in large Exchanges
- d) Drafting and approval of the Global Constitution by assembly based on Blockchain. Development of Global Working Groups - GCT2
- e) Approval of a "Global Constitution" that determines the functioning of the disintermediated banking (P2P BANKING) and of the Digital Assembly Democracy by majority of 4/5 of the GCT2 community
- f) Prevention plan against sexist terrorism

PHASE 3: 2020

- a) Celebration of elections.
- b) Prevention plan against racism, homophobia and xenophobia
- c) Fork voting (possible creation of private Blockchain)
- d) Wallet Update
- e) Start of activities in the Energy Sector
- f) Start of activities in the Real Estate Sector
- g) Opening of proposals to have guaranteed drinking water throughout the world

PHASE 4: 2021

- a) Gateway of purchase / Development of a market with physical goods based on Blockchain and 3D printing
- b) Incursion of the assembly movement in government institutions: Creation of Citizen Platforms in different countries in order to bring Digital Assembly Democracy to their institutions, in a peaceful, democratic and moderate manner.

PHASE 5: 2022

- a) Plan against Global Hunger
- b) Plan for Human Rights Global

ESTIMATED INCOME

Due to the fourth pillar of the economic model, the pair GCT2 / WAVES, the revenues will be conditioned to the difference between the price of GCT2 and WAVES, being higher the smaller this difference, since this is the main responsible for the expenses of the system (Fees)

It is estimated that 1 GCT2 amounts to \$ 6 for the following reasons:

- Increase in the relative value of WAVES and GCT2 as this is essential for the operation of the platform based on blockchain by the Digital Assembly Democracy
- Increasing the economic activity linked to GCT2 and WAVES through the P2P BANKING disintermediated bank, allowing an ecosystem of small producers to innovate constantly as never before.
- Increase in the price of GCT2 when purchased by lobbies in order to influence decision making. We will develop a strategy in the "Intelligence and Development Group" in order to defend the system, guaranteeing that a person equals one vote.

RESERVE OF GCT2 FUNDS

There are 3,500,000,000 of GCT2, which we will put into circulation completely in a maximum period of 10 years. The distribution prior to the referendum that determines the budgets is articulated in the following way:

- 50,000,000 GCT2 in Airdrops, rewards and motivational token to our collaborators
- 1,250,000,000 GCT2 for sale and investment in startups (P2P BANKING)
- 500,000,000 GCT2 for the operation and projects derived from the Digital Assembly Democracy promoted by the Golden Cloud Token community [GCT2]
- 1,700,000,000 GCT2 for the organization's own funds, as a reserve fund, with the prospect of drawing up a global action plan approved by referendum with specific milestones located within a maximum period of 10 years.

DISTRIBUTION MODEL

A welcome token will be given to each person who:

- Be listed in a work group and indicate your GCT2 / WAVES portfolio
- Do a simple job of promoting GCT2
- Provide your identification data (email, telephone and / or fingerprint) to prepare a census in GCT2.

The GCT2 can also be donated among users to facilitate the existence of disadvantaged classes in the system. At the end of the year there will be a contest to reward solidarity through GCT2.

Once the allocated portion of the 50,000,000 GCT2 to airdrops has been used up, there will be no more free distribution of GCT2.

To receive a free GCT2, you can sign up to sign up as long as there is a free distribution of GCT2 at one of these addresses:

- a) Global working group: <https://t.me/joinchat/JkSEzhOH7veqeo3R7gztKQ>
- b) Airdrop Channel in the WAVES Forum:
<https://forum.wavesplatform.com/t/gct2-waves-p2p-banking-bye-bye-banks-we-will-democratize-the-economy-airdrop-and-description/5115>
- c) Channel GCT2 - Work Channel Group:
<https://forum.wavesplatform.com/t/gct2-global-work-channel-https-www-goldencloudtoken-com/6393>

MONETARY AND LABOR JUSTICE

Once the round of airdrops is finished, there will not be any more free GCT2 for any registered collaborator, which may not be completely distributed, burned or allocated for purposes approved by referendum in the Digital Democratic Assembly.

The startups will exchange their tokens with GCT2 in order to be promoted in the system, if they wish, as well as finance the Digital Assembly Democracy from which they get employees who promote them through different social networks.

Working conditions will be set by referendum, distinguishing at first the following working groups:

- Global
- Europe
- Africa
- Asia
- America

- Oceania
- Intelligence and Development
- Defending
- Internal Justice

We will determine by referendum the most appropriate way to coordinate, enjoying each group or community of autonomy and independence as long as they defend the values of the Digital Assembly Democracy and its entire community.

THE PRINCIPLE OF COOPERATION. CONFLICTS OF INTEREST

Working groups can be proposed by any member, as well as begin to work, being necessary their communication to GCT2 to be included as an independent work group, post their work and receive GCT2. All the independent groups that work without the approval of GCT2 will not be able to receive remuneration for their work, on having understood that they develop their own project. The approval will be sent through a GCT2 with a comment that contains a unique and non-transferable code. If this code is misused or lost, we will take the collaborators involved before the "Internal Justice work group", to determine its sanction.

Under no circumstances can a collaborator be expelled from the system. Democracy only works if everyone participates.

The working groups will have at least 15% of administrators, with the exception of certain channels belonging to the "intelligence and development working group", which will have secret chats, spies and a computer attack team for emergencies in the network.

We ask any collaborator of GCT2 to denounce any authoritarian, warmongering, racist, xenophobic, homophobic, macho behavior or any other behavior contrary to the Golden Cloud Token [GCT2] philosophy and the Digital Assembly Democracy. To do this we enable the email abuse@goldencloudtoken.com to fight against internal corruption, abuses of power and authoritarianism, these being the main evils of the working groups.

CONTRIBUTION OF GCT2 RESOURCES

Golden Cloud Token [GCT2] will provide:

- A means of registration of identity and property: We will guarantee through the blockchain the existence of people in impoverished countries, where large corporations expropriate their land without compensation, leaving these people without property because they can not prove their existence, nor therefore, his property. We believe that defending people will strengthen P2P BANKING, as well as enriching those involved, since the current situation is looting.
- A disintermediated bank that will replace a banking system in those countries where there is no banking infrastructure, and will allow in developed countries the introduction of the collaborative economy model promoted by P2P BANKING of GCT2.
- A model of digital assembling democracy based on blockchain with very low costs, extrapolated to countries where the cost of the political class is much higher than the proposed system or in those countries where the concept of "representativeness" is rejected because it is not real .
- A constant investment of capital generated from the attraction of talent, because history has shown that science, art and research, despite generating immense income, have a purpose on the part of their creators much more important and important than that of hoarding large masses of money.
- A global economy without slavery, abuses between countries or world wars, because these are the maximum manifestation of the "traditional states" in their collapse.
- An exponentially more participatory economy with lower management costs, which will increase individual wealth by eliminating intermediaries such as the political class and obsolete companies. This economy will also be unbreakable and unique. You can not defraud or hide funds thanks to the inherent transparency of blockchain. Nor can it be corrupted for the same reason because for the first time we will introduce the concept of "mathematical truth" in the markets.
- The beginning of a "multi-capitalist" system, with thousands of democratic communities exchanging goods with each other. Competing in a market based on blockchain, with "much smaller whales" before the mass market and its eminent social will.

PART IV: THIS IS NOT THE END.

SHORT, LONG AND LONG TERM FORECASTS

This is an alternative to capitalism and communism that is inspired by Greek democracy as a basis, not the current "representative democracy", to empower the individual from the decentralization possible thanks to blockchain. In Spain it is not named like that, here we are talking about "Parliamentary Monarchy". The change is urgent and necessary before the erosion of the political class and the new more profitable and efficient ways of organizing society.

After the study of the human being, we see that people when they have come together for a just cause have managed to convince peacefully, without great speeches, simply showing that what many people defend is defended because it is better.

Personally I think that a global platform is needed that brings together all intelligent, committed and democratic people in order to build a new form of government and a new economic theory, based on freedom, democracy and social justice.

In the short term, the impact of Golden Cloud Token [GCT2] will be measured by its profitability.

In the medium term, the impact of Golden Cloud Token [GCT2] will be measured by the change in mentality.

In the long term, the impact of Golden Cloud Token [GCT2] will be measured in terms of Digital Assembly Assemblies and Disintermediated Banking.

First General Coordinator of Golden Cloud Token

December 21, 2018. Birth of the Digital Assembly Assembly Democracy.
